# Team Pink Final Presentation

20200445 박은하 20200927 장유진 20200220 오상윤

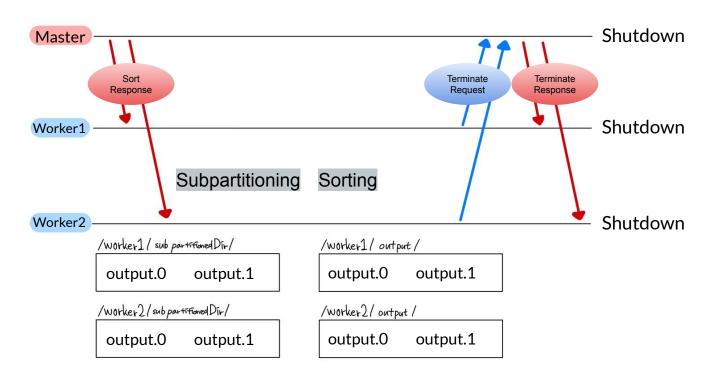

#### Design

#### Design

#### Design

#### **Experiment for correctness**

4 workers with individually 2 inputs.

Each file is 32MB (sum of the all inputs is 256MB)

- Master: vm 7

Workers : vm 3/4/5/6

#### **Experiment for correctness**

```
Total output bytes is 256000000

[success] Total time: 134 s (02:14), completed Dec 10, 2022 4:39:27 PM
```

All Loggers of master : 134 s (실제는 더 작을 것이다)

```
INFO: shutdown(): Keep watching me shut you down!!!
[success] Total time: 44 s, completed Dec 10, 2022 4:39:15 PM
```

All Loggers of one worker: 44 s

#### **Experiment for correctness - Start**

```
[info] running network.Master 4
Dec 10, 2022 4:37:34 PM network.NetworkServer open
INFO: Server started, listening on 50051
2.2.2.107:50051
```

Workers IP address: 2.2.2.103 2.2.2.106 2.2.2.104 2.2.2.105

#### **Experiment for correctness - Directory**

Sample

```
pink@vm03:/tmp/sampleDir$ ls
sample
```

PartitionedDir

```
ShuffledDir
```

```
pink@vm03:/tmp/shuffledDir$ ls
shuffle-1-0-5582065970176649619 shuffle-2-1-2846142947449915089 shuffle-4-0
shuffle-1-1-1648586296099586825 shuffle-3-0-197336383672294280 shuffle-4-1
shuffle-2-0-5146201507111247591 shuffle-3-1-5652756852380941284
```

subpartitionedDir

```
pink@vm03:/tmp/subpartitionedDir$ ls
output.0 output.1
```

#### **Experiment for correctness - sampling**

Sample (Worker) pink@vm03:/tmp/sampleDir\$ ls
sample

Sample (Master)

```
| Spink@wm07: /tmp/master | Spink@wm07: /tmp/s | Sperfdata_red | Sperfdata_red | Sperfdata_rot | Sperfdata_rot
```

Sampled Data (Master)

```
pink@vm07: /tmp/master
pink@vm07:/tmp/master$ head ^C
pink@vm07:/tmp/master$ head sample_15067081710339626005
                              ~sHd0jDv6X
       77779999444488885555CCCC77775555555BBBB666644446666
                              CCCCFFFF777799995555FFFF11112222999988884444DDDDFFFF

0000AAAA888FFFF0000888800000000222255551111FFFFEEEE
pink@vm07:/tmp/master$
```

#### **Experiment for correctness - Dividing**

Dividing (Master)

```
INFO: [Dividing] Get all workers get ranges

Dec 11, 2022 9:08:19 PM network.NetworkServer$ConnectionImpl divide

INFO: [divide] Send ranges to Worker2: (3HUeZy.+ZU,U8Jry?Q}b>)

Dec 11, 2022 9:08:23 PM network.NetworkServer$ConnectionImpl divide

INFO: [divide] Send ranges to Worker3: (U8Jry?Q}b>,di>*+Yu-sQ)

Dec 11, 2022 9:08:24 PM network.NetworkServer$ConnectionImpl divide

INFO: [divide] Send ranges to Worker1: ( ,3HUeZy.+ZU)

Dec 11, 2022 9:08:24 PM network.NetworkServer$ConnectionImpl divide

INFO: [divide] Send ranges to Worker4: (di>*+Yu-sQ,~~~~~~~~~~~)
```

#### Experiment for correctness - partitioning & shuffling

PartitionedDir (receiver - input)

ShuffledDir (sender - input )

```
pink@vm03:/tmp/shuffledDir$ ls
shuffle-1-0-5582065970176649619 shuffle-2-1-2846142947449915089 shuffle-4-0
shuffle-1-1-1648586296099586825 shuffle-3-0-197336383672294280 shuffle-4-1
shuffle-2-0-5146201507111247591 shuffle-3-1-5652756852380941284
```

#### **Experiment for correctness - subpartitioned**

```
pink@vm03:/tmp/subpartitionedDir$ ls
output.0 output.1
```

#### **Experiment for correctness - Terminate**

INFO: [terminate] All Workers terminated. Master terminate
Total output bytes is 256000000

Master print the sum of all output files sizes from individual workers. Input was 256MB and the result byte is 256000000. (This printf is used for testing)

#### **Experiment for correctness - output**

vm 03 range from : "{Y>:#%` range to : Vu1s\$HZwQ; vm 06 range from : Vu27GO]\$g? range to : k\$&X\sS}`T

vm 04 range from : k\$'a~gf{Z. range to : pW3|:18,%

 vm 05 -

range from : pW9cf)7^Z@ range to : ~~}+tO+-g}

### **Experiment for correctness - Each working sorting test**

```
[info] SortingTest:
[info] - sort
[info] Run completed in 894 milliseconds.
[info] Total number of tests run: 1
[info] Suites: completed 1, aborted 0
[info] Tests: succeeded 1, failed 0, canceled 0, ignored 0, pending 0
[info] All tests passed.
[success] Total time: 7 s, completed Dec 10, 2022 5:33:16 PM
```

### Milestones completed

|                               | plan   | progress                                                                                  | final                               |
|-------------------------------|--------|-------------------------------------------------------------------------------------------|-------------------------------------|
| #1. Understand problem        | week 1 | First meeting : too lazy -> week 2                                                        | week 2                              |
| #2. Design module and message | week 3 | finish message<br>design at week3 but<br>we didn't consider<br>module design<br>-> week 5 | delay by module<br>design<br>week 5 |

#### Milestones completed

|               | plan   | progress | final                                    |
|---------------|--------|----------|------------------------------------------|
| #3. Implement | week 5 | week 6   | delay by unexpected error week 7         |
| #4. Test      | week 8 | week 8   | week 8 -> cannot test about many workers |

#### unexpected error:

file path name error(in shuffle), master termination error, worker termination error

#### **Project management**

- who is responsible for what?

: 오상윤 - 구현 총괄, 디자인 총괄, Client 네트워크 및 기능 구현

: 박은하 - 테스트 총괄, File 관리 기능 구현

: 장유진 - 문서화 담당, Master 네트워크 및 기능 구현

#### What we learned from the project

- Do not be **optimistic** -> we have to make more progress at week 1 and 2
- **Assertion** is a powerful checkpoint
  - -> we can find the cause of subpartition error immediately
- **Time** is most important resource
- Communication overhead was too big -> compared with pintos project
- Do not bite off more than we can chew -> too much care about other's code

## Thank You

Team Pink
